

## [2,2'-Biquinoline]-4,4'-dicarboxylic acid

Cat# C3357 | Storage at 2-8°C.

### Description

[2,2'-Biquinoline]-4,4'-dicarboxylic acid is an organic compound with a unique structure, widely used in various fields. Its distinctive bis-quinoline structure and carboxylic acid groups enable it to exhibit excellent performance in multiple applications.

### Product Advantages

**High Purity:** This product is of high purity, meeting the demanding requirements of scientific research and industrial applications.

**Good Stability:** It possesses good chemical stability and reproducibility.

**Wide Applications:** It demonstrates outstanding performance and potential applications in multiple high-tech fields.

**Cas No.:** 1245-13-2

**Purity:** ≥98%

**Molecular Weight:** 344.326

**Molecular Formula:** C<sub>20</sub>H<sub>12</sub>N<sub>2</sub>O<sub>4</sub>

**Alias:** Bicinchoninic acid

**Chemical structure:**
